AI Enablers for Smart Retail and Intelligent Marketing

Kevin Yeung
Associate Director
2024 - 7

New Factors of Production
Data and Energy

New Standard Equipment
Artificial Intelligence

Discriminative/Predictive AI

Generative AI

Discriminative/Predictive AI

- For image classifications and groupings of customers
- Computations based on input data
- Supervised, unsupervised, and reinforcement learning
- Focus on specific conditions

Generative AI

- Generate new contents (text, image, music, videos)
- Make suggestions through incomplete data or self-generated samples
- Self-adjustments and self-learning
- Focus on the likelihood

Discriminative/Predictive AI

- Eligibility of awards
- Facial/ Sentiment Recognition
- Filtering of unwanted items

Quantitative Change

Generative AI

- Art Creation
- Mimic human thoughts
- Create synthetic data for testing

- Taiwan (June 2023)

STARBUCKS COFFEE

Integrated AI Strategy of Starbucks

Some Suggestions

- Consumers centric, Omni-channels
- AI is unavoidable
- Identify the biggest pain points and match with the corresponding AI function
- Start with single modal model
- Make the benefits visible to internal
- Need a new culture to embrace changes and develop new skills
- Data Policy – IOT data collection, centralized data platform, data driven strategy, data security.
- Nurture super agents and save them from repetitive tasks
- Further enhancement of brand and product differentiation, ESG, etc.

**The journey of a
thousand miles begins
with a single step**
